

5-Minute Epoxy LOS 340

LOS340 is a two-component-epoxy-adhesive for metal, concrete, ceramic, glass, wood and many other materials.

LOS340 forms a flexible and impact resistant connection, even at low temperatures. High shear and impact resistance.

Advantages:

- Easy mixing – Mixing ration 1:1
- Permanent flexible adhesion
- Free of solvents
- No shrinkage
- Resistant against many chemicals

Application:

Surface to be worked on must be clean and rough. The contents of syringes and cartridges are mixed when expressing over the mixers, otherwise mix material evenly and apply to the surface. Join parts together. At processing temperatures less than 15° Celsius: preheat cartridge material (hand-hot).

Technical Details:

Appearance:	Liquid
Colour	clear
Mixture:	1:1
Temperature resistance:	-40°C - +100°C
Work Life:	3-6 minutes
Functional hardening:	45 – 60 minutes
Mixed viscosity:	8000 – 10000 mPas
Shelf Stability :	min. 12 months
